Set 1

Knowledge has turned out to be man's greatest asset in mastering and conquering nature. The word science means literally knowledge. It is this quest and thrust for knowledge and the curiosity of man to know things beyond his reach that resulted in his becoming the lord of this planet. His never ending pursuit to unearth the reason behind phenomenon has resulted in endless discoveries and inventions, which have proved to be the grate stepping stones in the progress of mankind.

Inventions like the telephone, radio, t.v, telegraph, transistors, airplanes, automobiles, steam engine, electricity, wireless, telescopes, microscope etc, have changed man's life forever. There have been inventions and discoveries in all aspects of life. Science has worked grater miracles in the fields of health and medicine and has been the greatest weapon in man's battle against diseases of various kinds. Vaccination is a miracle in the field of science. Penicillin, streptomycin, radium and x-rays have turned out be great blessings.

The discovery of the atom and its structure has been one of the most remarkable discoveries made by man. The quantum theory, the electricity along with the great findings of Einstein, Neils Bohr etc, have revolutionised the world of science forever. Computer and information technology are the latest revolutions in the field of science. With the coming of mobiles, internet, web conferencing etc, the world has shrunk into a cyber village where time and distance have no meaning are at least are no longer barriers.

Technology is on a rise every day. Each new day brings better technology with it. However, we should learn to use our knowledge constructively. Only constructive uses of science can guarantee the continuation of mankind on this earth. Moreover, it is man who is the great generator, creator and inventor of all this knowledge and technology. We should be warned of becoming slaves to our own creations and inventions. Only then, can science be a blessing and a miracle. Science, if used for the betterment of mankind and society can bring about changes in our lives by making better, more comfortable and worthwhile.

Read the passage given below and answer the questions that follow:

The day the cat was killed, Maddy watched her mother wind that old clock with her same little smile, cracking the gold key into its funny hole, as grandma wandered around the dining table in her dressing gown while her nurse read a pulp fiction on the front step, while her Brothers scrapped their forks against the table and dripped the bits of potatoes and corn from their open, awful mouths, that clock sat heavy on the white carpet, at the end of the hall, mom humming along to that terrible ticking. It made Maddy's teeth clench. Truly, there was no point to these silly, endless family dinners. Always being six o'clock sharp and never over until that clock was wound, thirteen years of her life wasted for this nonsense so far, burnt up in bedroom, when all the while she had some very important matters to attend to back in her bedroom. The long case clock had been left by the previous owner, or maybe the one before that, no one was sure. Cloaked In pine wood and always counting, no birds printed around the clock face, no farm scenes or flowers, just back numbers and wiry hands and that was that. Then near the bottom, along silver pendulum behind a square of Smokey glass. It was too heavy to tip, too tal to place anything on top, old and faded and always suspect. Her brothers avoided it at night and the cat avoided it entirely (or used to). The clock face glowing round and white, over the wooden suit, like a pale face ghost or a porcelain reaper, feetless and shadows for arms. And mom would sing along with the pendulum while the boy knocked over kitchen chairs wrestling and playing tag, and grandmother would nap by the television and the nurse would paints her nails. All the time, her nails, her mom would smile and hum.

Question 1

PASSAGE-1

The impressive recent growth of certain sectors of the Indian economy is a necessary but insufficient condition for the elimination of extreme poverty.

In order to ensure that the poorest benefit from this growth, and also contribute to it, the expansion and improvement of the microfinance sector should be a national priority. Studies suggest that the impact of microfinance on the poorest is greater than on the poor, and yet another that non-participating members of communities where microfinance operates experience socio-economic gains — suggesting strong spillover effects. Moreover, well-managed microfinance institutions (MFIs) have shown a capacity to wean themselves off of subsidies and become sustainable within a few years.

Microfinance is powerful, but it is clearly no panacea. Microfinance does not directly address some structural problems facing Indian society and the economy, and it is not yet as efficient as it will be when economies of scale are realized and a more supportive policy environment is created.

Loan products are still too inflexible, and savings and insurance services that the poor also need are not widely available due to regulatory barriers.

Still, microfinance is one of the few market-based, scalable anti-poverty solutions that is in place in India today, and the argument to scale it up to meet the overwhelming need is compelling. According to Sa-Dhan, the overall outreach is 6.5 million families and the sector-wide loan portfolio is Rs 2,500 crore.

However, this is meeting only 10% of the estimated demand. Importantly, new initiatives are expanding this success story to some of the country's poorest regions, such as eastern and central Uttar Pradesh.

The local and national governments have an important role to play in ensuring the growth and improvement of microfinance. First and foremost, the market should be left to set interest rates, not the state. Ensuring transparency and full disclosure of rates including fees is something the government should ensure, and something that new technologies as well as reporting and data standards are already enabling.

Furthermore, government regulators should set clear criteria for allowing MFIs to mobilize savings for on-lending to the poor; this would allow for a large measure of financial independence amongst well-managed MFIs. Each Indian state could consider forming a multi-party working group to meet with microfinance leaders and have a dialogue with them about how the policy environment could be made more supportive and to clear up misperceptions.

There is an opportunity to make a real dent in hard-core poverty through microfinance. By unleashing the entrepreneurial talent of the poor, we will slowly but surely transform India in ways we can only begin to imagine today.

Question 2

PASSAGE-2

WHEN it came to promoting its new video-game console, the Wii, in America, Nintendo recruited a handful of carefully chosen suburban mothers in the hope that they would spread the word among their friends that the Wii was a gaming console the whole family could enjoy together. Nintendo thus became the latest company to use “word-of-mouth” marketing. Nestlé, Sony and Philips have all launched similar campaigns in recent months to promote everything from bottled water to electric toothbrushes. As the power of traditional advertising declines, what was once an experimental marketing approach is becoming more popular.

After all, no form of advertising carries as much weight as an endorsement from a friend. “Amway and Tupperware know you can blend the social and economic to business advantage,” says Walter Carl, a marketing guru at Northeastern University. The difference now, he says, is that the internet can magnify the effect of such endorsements.

The difficulty for marketers is creating the right kind of buzz and learning to control it. Negative views spread just as quickly as positive ones, so if a product has flaws, people will soon find out. And Peter Kim of Forrester, a consultancy, points out that when Microsoft sent laptops loaded with its new Windows Vista software to influential bloggers in an effort to get them to write about it, the resulting online discussion ignored Vista and focused instead on the morality of accepting gifts and the ethics of word-of-mouth marketing. Bad buzz, in short.

BzzAgent, a controversial company based in Boston that is one of the leading exponents of word-of-mouth marketing, operates a network of volunteer “agents” who receive free samples of products in the post. They talk to their friends about them and send back their thoughts. In return, they receive rewards through a points program—an arrangement they are supposed to make clear. This allows a firm to create buzz around a product and to see what kind of word-of-mouth response it generates, which can be useful for subsequent product development and marketing. Last week BzzAgent launched its service in Britain. Dave Balter, BzzAgent's

founder, thinks word-of-mouth marketing will become a multi-billion dollar industry. No doubt he tells that to everyone he meets.

b. There is enough evidence to state that word-of-mouth marketing is useful.
c. Evidence shows that word of mouth marketing is a failed technique.

d. Word of mouth marketing is unethical.

Question 3

PASSAGE-3

GIVE people power and discretion, and whether they are grand viziers or border guards, some will use their position to enrich themselves. The problem can be big enough to hold back a country's development. One study has shown that bribes account for 8% of the total cost of running a business in Uganda. Another found that corruption boosted the price of hospital supplies in Buenos Aires by 15%. Paul Wolfowitz, the head of the World Bank, is devoting special efforts during his presidency there to a drive against corruption.

For most people in the world, though, the worry is not that corruption may slow down their country's GDP growth. It is that their daily lives are pervaded by endless hassles, big and small. And for all the evidence that some cultures suffer endemic corruption while others are relatively clean, attitudes towards corruption, and even the language describing bribery, is remarkably similar around the world.

In a testament to most people's basic decency, bribe-takers and bribe-payers have developed an elaborate theatre of dissimulation. This is not just to avoid detection. Even in countries where corruption is so common as to be unremarkable and unprosecutable—and even when the transaction happens far from snooping eyes—a bribe is almost always dressed up as some other kind of exchange. Though most of the world is plagued by corruption, even serial offenders try to conceal it.

One manifestation of this is linguistic. Surprisingly few people say: “You are going to have to pay me if you want to get that done.” Instead, they use a wide variety of euphemisms. One type is quasi-official terminology. The first bribe paid by your correspondent, in Ukraine in 1998, went to two policemen so they would let him board a train leaving the country. On the train into Ukraine, the customs officer had absconded with a form that is needed again later to leave the country. The policemen at the station kindly explained that there was a *shtraf*, a “fine” that could be paid instead of producing the document. The policemen let him off with the minimum *shtraf* of 50 hryvnia (\$25).

Another term widely used at border crossings is “expediting fee”. For a euphemism it is surprisingly accurate: paying it will keep your bags, and perhaps your contraband, from being dumped onto a floor and sifted through at a leisurely pace. (A related term, used in India, is “speed money”: paying it can get essential business permits issued considerably faster.)

Paul Lewis, an analyst with the Economist Intelligence Unit (a sister company to *The Economist*), describes the quasi-business terminology typically used for bribery in the post-communist privatisations of eastern Europe. A mostly useless but well-connected insider at the company is hired as a “consultant”. The consultant is paid a large official “fee”, nominally for

his industry expertise, on the understanding that he will cut in the minister and other decision-makers.

A second type of euphemism dresses up a dodgy payment as a friendly favour done by the bribe-payer. There is plenty of creative scope. Nigerian policemen are known to ask for “a little something for the weekend”. A North African term is “*un petit cadeau*”, a little gift. Mexican traffic police will suggest that you buy them a *refresco*, a soft drink, as will Angolan and Mozambican petty officials, who call it a *gazoso* in Portuguese. A businessman in Iraq told Reuters that although corruption there is quite overt, officials still insist on being given a “good coffee”. Double meaning can help soothe the awkwardness of bribe-paying. *Baksheesh*, originally a Persian word now found in many countries of the Middle East, can mean “tip”, “alms” and “bribe”. Swahili-speakers can take advantage of another ambiguous term. In Kenya a machine-gun-wielding guard suggested to a terrified Canadian aid worker: “Perhaps you would like to discuss this over tea?” The young Canadian was relieved: the difficulty could be resolved with some *chai*, which means both “tea” and “bribe”.

India lives in several centuries at the same time. Somehow we manage to progress and regress simultaneously. As a nation we age by pushing outward from the middle—adding a few centuries on either end of the extraordinary CV. We greaten like the maturing head of a hammerhead shark with eyes looking in diametrically opposite directions.

I don’t mean to put a simplistic value judgment on this peculiar form of “progress” by suggesting that Modern is Good and Traditional is Bad—or vice versa. What’s hard to reconcile oneself to, both personally and politically, is the schizophrenic nature of it. That applies not just to the ancient/modern conundrum but to the utter illogic of what appears to be the current national enterprise. In the lane behind my house, every night I walk past road gangs of emaciated laborers digging a trench to lay fiber-optic cables to speed up our digital revolution. In the bitter winter cold, they work by the light of a few candles.

It’s as though the people of India have been rounded up and loaded onto two convoys of trucks (a huge big one and a tiny little one) that have set off resolutely in opposite directions. The tiny convoy is on its way to a glittering destination somewhere near the top of the world. The other convoy just melts into the darkness and disappears. A cursory survey that tallies the caste, class and religion of who gets to be on which convoy would make a good Lazy Person’s concise Guide to t

PASSAGE-4

The economic transformation of India is one of the great business stories of our time. As stifling government regulations have been lifted, entrepreneurship has flourished, and the country has become a high-powered center for information technology and pharmaceuticals. Indian companies like Infosys and Wipro are powerful global players, while Western firms like G.E. and I.B.M. now have major research facilities in India employing thousands. India's seemingly endless flow of young, motivated engineers, scientists, and managers offering developed-world skills at developing-world wages is held to be putting American jobs at risk, and the country is frequently heralded as "the next economic superpower."

But India has run into a surprising hitch on its way to superpower status: its inexhaustible supply of workers is becoming exhausted. Although India has one of the youngest workforces on the planet, the head of Infosys said recently that there was an "acute shortage of skilled manpower," and a study by Hewitt Associates projects that this year salaries for skilled workers will rise fourteen and a half per cent, a sure sign that demand for skilled labor is outstripping supply. How is this possible in a country that every year produces two and a half million college graduates and four hundred thousand engineers? Start with the fact that just ten per cent of Indians get any kind of post-secondary education, compared with some fifty per cent who do in the U.S. Moreover, of that ten per cent, the vast majority go to one of India's seventeen thousand colleges, many of which are closer to community colleges than to four-year institutions. India does have more than three hundred universities, but a recent survey by the London Times Higher Education Supplement put only two of them among the top hundred in the world. Many Indian graduates therefore enter the workforce with a low level of skills. A current study led by Vivek Wadhwa, of Duke University, has found that if you define "engineer" by U.S. standards, India produces just a hundred and seventy thousand engineers a year, not four hundred thousand. Infosys says that, of 1.3 million applicants for jobs last year, it found only two per cent acceptable.

There was a time when many economists believed that post-secondary education didn't have much impact on economic growth. The really important educational gains, they thought, came from giving rudimentary skills to large numbers of people (which India still needs to do—at least thirty per cent of the population is illiterate). They believed that, in economic terms, society got a very low rate of return on its investment in higher education. But lately that assumption has been overturned, and the social rate of return on investment in university education in India has been calculated at an impressive nine or ten per cent. In other words, every dollar India puts into higher education creates value for the economy as a whole. Yet India spends roughly three and a half per cent of its G.D.P. on education, significantly below the percentage spent by the U.S., even though India's population is much younger, and spending on education should be proportionately higher.

The irony of the current situation is that India was once considered to be overeducated. In the seventies, as its economy languished, it seemed to be a country with too many engineers and Ph.D.s working as clerks in government offices. Once the Indian business climate loosened up, though, that meant companies could tap a backlog of hundreds of thousands of eager, skilled workers at their disposal. Unfortunately, the educational system did not adjust to the new realities. Between 1985 and 1997, the number of teachers in India actually fell, while the percentage of students enrolled in high school or college rose more slowly than it did in the rest of the world. Even as the need for skilled workers was increasing, India was devoting relatively fewer resources to producing them.

Since the Second World War, the countries that have made successful leaps from developing to developed status have all poured money, public and private, into education. South Korea now spends a higher percentage of its national income on education than nearly any other country in the world. Taiwan had a system of universal primary education before its phase of hypergrowth began. And, more recently, Ireland's economic boom was spurred, in part, by an opening up and expansion of primary and secondary schools and increased funding for universities.

Education will be all the more important for India's well-being; the earlier generation of so-called Asian Tigers depended heavily on manufacturing, but India's focus on services and technology will require a more skilled and educated workforce.

India has taken tentative steps to remedy its skills famine—the current government has made noises about doubling spending on education, and a host of new colleges and universities have sprung up since the mid-nineties. But India's impressive economic performance has made the problem seem less urgent than it actually is, and allowed the government to defer difficult

choices. (In a country where more than three hundred million people live on a dollar a day, producing college graduates can seem like a low priority.) Ultimately, the Indian government has to pull off a very tough trick, making serious changes at a time when things seem to be going very well. It needs, in other words, a clear sense of everything that can still go wrong. The paradox of the Indian economy today is that the more certain its glowing future seems to be, the less likely that future becomes

1. Which of these could you infer according to the passage?

Option 1 : Wages in the Developing countries are less as compared to wages in the developed countries

Option 2 : Wages in the Developing countries are more as compared to wages in the developed countries

Option 3 : Wages in the Developing countries are same as wages in the developed countries

Option 4 : None of these

2. What does "American jobs" in the last line of the first paragraph of the passage imply?

Option 1 : Jobs provided by American companies

Option 2 : Jobs held (or to be held) by American people

Option 3 : Jobs open to only American citizens

Option 4 : Jobs provided by the American government

3. According to the passage, why India does not have enough skilled labour?

Option 1 : The total amount of young population is low

Option 2 : The total number of colleges are insufficient

Option 3 : Students do not want to study

Option 4 : Maximum universities and colleges do not match global standards.

4. What can you infer as the meaning of 'stifling' from the passage?

Option 1 : Democratic Option 2 : Liberal Option 3 : Impeding Option 4 : Undemocratic

5. What is an appropriate title to the passage?

Option 1 : Growing Indian Economy Option 2 : Higher education in India

Option 3 : India's Skill Shortage Option 4 : Entrepreneurship in India

6. In the third sentence of the third paragraph of the passage, the phrase "closer to community colleges " is used. What does it imply?

Option 1 : Near to community colleges Option 2 : Like community colleges

Option 3 : Close association to community colleges Option 4 : None of these

7. According to the passage, what is the paradox of the Indian economy today?

a. The economic progress is impressive, but the poor (earning one dollar per day) are not benefited.

b. The economic progress is impressive disallowing the government to take tough decisions.

- c. There is not enough skilled workforce and the government does not realize this.
- d. Government is not ready to invest in setting up new universities.

8. Why are salaries for skilled workers rising?

Option 1 : Companies are paying hire to lure skilled people to jobs.

Option 2 : American companies are ready to pay higher to skilled workers.

Option 3 : Entrepreneurship is growing in India.

Option 4 : There is not enough skilled workers, while the demand for them is high.

PASSAGE

Sixty years ago, on the evening of August 14, 1947, a few hours before Britain's Indian Empire was formally divided into the nation-states of India and Pakistan, Lord Louis Mountbatten and his wife, Edwina, sat down in the viceregal mansion in New Delhi to watch the latest Bob Hope movie, "My Favorite Brunette." Large parts of the subcontinent were descending into chaos, as the implications of partitioning the Indian Empire along religious lines became clear to the millions of Hindus, Muslims, and Sikhs caught on the wrong side of the border. In the next few months, some twelve million people would be uprooted and as many as a million murdered. But on that night in mid-August the bloodbath—and the fuller consequences of hasty imperial retreat—still lay in the future, and the Mountbattens probably felt they had earned their evening's entertainment.

Mountbatten, the last viceroy of India, had arrived in New Delhi in March, 1947, charged with an almost impossible task. Irrevocably enfeebled by the Second World War, the British belatedly realized that they had to leave the subcontinent, which had spiralled out of their control through the nineteen-forties. But plans for brisk disengagement ignored messy realities on the ground. Mountbatten had a clear remit to transfer power to the Indians within fifteen months. Leaving India to God, or anarchy, as Mohandas Gandhi, the foremost Indian leader, exhorted, wasn't a political option, however tempting. Mountbatten had to work hard to figure out how and to whom power was to be transferred.

The dominant political party, the Congress Party, took inspiration from Gandhi in claiming to be a secular organization, representing all four hundred million Indians. But many Muslim politicians saw it as a party of upper-caste Hindus and demanded a separate homeland for their hundred million co-religionists, who were intermingled with non-Muslim populations across the subcontinent's villages, towns, and cities. Eventually, as in Palestine, the British saw partition along religious lines as the quickest way to the exit.

But sectarian riots in Punjab and Bengal dimmed hopes for a quick and dignified British withdrawal, and boded ill for India's assumption of power. Not surprisingly, there were some notable absences at the Independence Day celebrations in New Delhi on August 15th. Gandhi, denouncing freedom from imperial rule as a "wooden loaf," had remained in Calcutta, trying, with the force of his moral authority, to stop Hindus and Muslims from killing each other. His great rival Mohammed Ali Jinnah, who had fought bitterly for a separate homeland for Indian Muslims, was in Karachi, trying to hold together the precarious nation-state of Pakistan. Nevertheless, the significance of the occasion was not lost on many. While the Mountbattens were sitting down to their Bob Hope movie, India's constituent assembly was convening in New Delhi. The moment demanded grandiloquence, and Jawaharlal Nehru, Gandhi's closest disciple and soon to be India's first Prime Minister, provided it. "Long years ago, we made a tryst with destiny," he said. "At the stroke of the midnight hour, while the world sleeps, India will awaken to life and freedom. A moment comes, which comes but rarely in history, when we step out from the old to the new, when an age ends, and when the soul of a nation, long suppressed, finds utterance."

Posterity has enshrined this speech, as Nehru clearly intended. But today his quaint phrase "tryst with destiny" resonates ominously, so enduring have been the political and psychological scars of partition. The souls of the two new nation-states immediately found utterance in brutal enmity. In Punjab, armed vigilante groups, organized along religious lines and incited by local politicians, murdered countless people, abducting and raping thousands of women. Soon, India and Pakistan were fighting a war—the first of three—over the disputed territory of Kashmir. Gandhi, reduced to despair by the seemingly endless cycle of retaliatory mass murders and displacement, was shot dead in January, 1948, by a Hindu extremist who believed that the father of the Indian nation was too soft on Muslims. Jinnah, racked with tuberculosis and overwork, died a few months later, his dream of a secular Pakistan apparently buried with him. Many of the seeds of postcolonial disorder in South Asia were sown much earlier, in two centuries of direct and indirect British rule, but, as book after book has demonstrated, nothing in the complex tragedy of partition was inevitable. In "Indian Summer" (Henry Holt; \$30), Alex von Tunzelmann pays particular attention to how negotiations were shaped by an interplay of personalities. Von Tunzelmann goes on a bit too much about the Mountbattens' open marriage and their connections to various British royals, toffs, and fops, but her account, unlike those of some of her fellow British historians, isn't filtered by nostalgia. She summarizes bluntly the economic record of the British overlords, who, though never as rapacious and destructive as the Belgians in the Congo, damaged agriculture and retarded industrial growth in India through a blind faith in the "invisible hand" that supposedly regulated markets. Von Tunzelmann echoes Edmund Burke's denunciation of the East India Company when she terms the empire's

corporate forerunner a “beast” whose “only object was money”; and she reminds readers that, in 1877, the year that Queen Victoria officially became Empress of India, a famine in the south killed five million people even as the Queen’s viceroy remained adamant that famine relief was a misguided policy.

Politically, too, British rule in India was deeply conservative, limiting Indian access to higher education, industry, and the civil service. Writing in the New York Tribune in the mid-nineteenth century, Karl Marx predicted that British colonials would prove to be the “unconscious tool” of a “social revolution” in a subcontinent stagnating under “Oriental despotism.” As it turned out, the British, while restricting an educated middle class, empowered a multitude of petty Oriental despots. (In 1947, there were five hundred and sixty-five of these feudatories, often called maharajas, running states as large as Belgium and as small as Central Park.)

1. From the passage, what can we conclude about the view of the author about Lord Mountbatten?

Option 1 : Appreciative Option 2 : Sarcastic Option 3 : Neutral Option 4 : Speculative

2. What is the author likely to agree to as the reason for the chaos in the sub-continent in 1947?

Option 1 : Because Gandhi was assassinated

Option 2 : Because the British left the sub-continent in haste.

Option 3 : Because the Hindus and Muslims could not live in peace.

Option 4 : Because Lord Mountbatten was watching a movie on 14th August 1947.

3. What could possibly "grandiloquence" mean as inferred from the context in which it has been used in the passage?

Option 1 : Grand Party Option 2 : Celebrations Option 3 : Lofty speech Option 4 : Destiny

4. What is the author primarily talking about in the article?

Option 1 : Mountbatten's association with India. Option 2 : Nehru's speech

Option 3 : Gandhi's assassination Option 4 : The aftermath of the partition.

5. In the view of the author, What does the Nehru's phrase "tryst with destiny" symbolise today?

Option 1 : A celebration of Indian Independence Option 2 : An inspirational quote

Option 3 : A reminder of Gandhi's assassination Option 4 : A symbol of the ills of the partition

6. The author persists on talking about the " Bob Hope movie" in the article. Why?

Option 1 : Because the movie was a classic of 1947

Option 2 : He thinks it caused the partition of the sub-continent.

Option 3 : He uses it to show the apathy of the Britishers towards the sub-continent

Option 4 : It was Mountbatten's favourite movie.

7. What does the author imply about the future of the Pakistan?

Option 1 : It becomes a secular country. Option 2 : It becomes unsecular.

Option 3 : It is unprosperous. Option 4 : It becomes a rogue state.

8. Why was Gandhi assassinated?

Option 1 : Because he was favouring the Muslims.

Option 2 : His assassin thought he was partial to the Muslims.

Option 3 : He got killed in the violence after partition.

Option 4 : None of these

PASSAGE

AT THE end of the 19th century, India's maharajahs discovered a Parisian designer called Louis Vuitton and flooded his small factory with orders for custom-made Rolls-Royce interiors, leather picnic hampers and modish polo-club bags. But after independence, when India's princes lost much of their wealth, the orders dried up. Then in 2002 LVMH, the world's largest luxury-goods group, made a triumphant return to India, opening a boutique in Delhi and another in Mumbai in 2004. Its target was the new breed of maharajah produced by India's liberalised economy: flush, flash, and growing in number.

Other purveyors of opulence followed, from Chanel to Bulgari. In recent months a multitude of swanky brands have announced plans to set up shop in India, including Dolce & Gabbana, Hermès, Jimmy Choo and Gucci. And Indian women will soon be invited to spend over \$100 on bras made by La Perla, an Italian lingerie firm. Only a tiny fraction, of course, will do so. But it is India's future prospects that have excited the luxury behemoths.

India has fewer than 100,000 dollar millionaires among its one billion-plus population, according to American Express, a financial-services firm. It predicts that this number will grow by 12.8% a year for the next three years. The longer-term ascendance of India's middle class, meanwhile, has been charted by the McKinsey Global Institute, which predicts that average incomes will have tripled by 2025, lifting nearly 300m Indians out of poverty and causing the middle class to grow more than tenfold, to 583m.

Demand for all kinds of consumer products is about to surge, in short. And although restrictions on foreign investment prevent retail giants such as Wal-Mart and Tesco from entering India directly, different rules apply to companies that sell their own products under a single brand, as luxury-goods firms tend to. Since January 2006 they have been allowed to take up to 51% in Indian joint ventures. India is also an attractive market for luxury goods because, unlike China, it does not have a flourishing counterfeit industry. Credit is becoming more easily available. And later this year *Vogue*, a fashion magazine, will launch an Indian edition.

Barriers to growth remain, however. High import duties make luxury goods expensive. Rich Indians tend to travel widely and may simply buy elsewhere. Finding suitable retail space is also proving a headache. So far most designer boutiques are situated in five star hotels.

But things are changing. Later this year Emporio, a new luxury-goods mall, will open in a prosperous neighborhood in the south of Delhi. It is likely to be the first of many. Even so, India could remain a difficult market to crack. Last October the Luxury Marketing Council, an international organization of 675 luxury-goods firms, opened its India chapter. Its boss, Devyani Raman, described India's luxury-goods market as "a cupboard full of beautiful clothes with a new outfit arriving every day—it could start to look messy without the right care". This, she said, included everything from teaching shop assistants appropriate manners to instilling in the Indian public a proper understanding of the concept of luxury. "How do you educate them", she asked, "about the difference between a designer bag that costs \$400 and a much cheaper leather bag that functions perfectly well?"

1. Who are the 'new breed of Maharajas' ?

Option 1 : Maharajas who recovered their wealth in 2004.

Option 2 : The children of the older Maharajas.

Option 3 : The new class of rich people which emerged in India post liberalisation.

Option 4 : None of these

2. What is the author most likely to agree to as the reason for the inflow of luxury good groups in India?

Option 1 : The fast growth in Indian economy leading to bright future prospects.

Option 2 : To serve 'the new breed of maharajas'.

Option 3 : To serve the tiny fraction of high income groups in India.

Option 4 : None of these

3. Why do different rules apply to Wal-Mart and luxury good firms?

Option 1 : India is encouraging luxury goods while it doesn't encourage Wal-Mart.

Option 2 : India is an attractive market for luxury goods.

Option 3 : There are different rules for retail firms and those that sell their own product.

Option 4 : India does not have a flourishing counterfeit industry.

4. What does Devyani Raman's statement imply?

Option 1 : Beautiful clothes are an important luxury item and should be taken care of.

Option 2 : The luxury goods market is becoming disorganized.

Option 3 : The supply of beautiful clothes is very high.

Option 4 : None of these

5. What could be the meaning of the word modish, as can be inferred from the context it is used in first line of the passage?

Option 1 : Unattractive

Option 2 : Stylish

Option 3 : New

Option 4 : Beautiful

6. What is the author most likely to agree to?

Option 1 : The current number of dollar millionaires in India is very high.

Option 2 : The current number of dollar millionaires in India is low.

Option 3 : The current number of dollar millionaires in India match world average.

Option 4 : None of these

7. What is a good estimate of the middle class population in India today as inferred from the passage?

Option 1 : 583m

Option 2 : 100,000

Option 3 : 58m

Option 4 : 300m

8. According to the author, which of these is not a problem for the luxury good firms in the Indian market?

A. High import duty.

2 : Difficulty in finding retail space.

B. Restriction on firms to enter Indian markets.

Option 4 : All of these

PASSAGE

SINCE the late 1970s when the technology for sex determination first came into being, sex-selective abortion has unleashed a saga of horror. Experts are calling it "sanitised barbarism". Demographic trends indicate the country is fast heading towards a million female fetuses aborted each year. Although foetal sex determination and sex selection is a criminal offence in India, the practice is rampant. Private clinics with ultrasound machines are doing brisk business. Everywhere, people are paying to know the sex of an unborn child. And paying more to abort the female child. The technology has even reached remote areas through mobile clinics. Dr. Puneet Bedi, obstetrician and specialist in foetal medicine, says these days he hardly sees a family with two daughters. People are getting sex determination done even for the first child, he says.

A recent media workshop on the issue of sex selection and female foeticide brought home the extent of the problem. Held in Agra in February, the workshop was organised by UNICEF, Business Community Foundation, and the Centre for Advocacy and Research. Doctors, social scientists, researchers, activists, bureaucrats, journalists told their stories of what they were doing to fight the problem. If the 1991 Census showed that two districts had a child sex ratio (number of girls per thousand boys) less than 850; by 2001 it was 51 districts. Child rights activist Dr. Sabu George says foeticide is the most extreme form of violence against women. "Today a girl is several times more likely to be eliminated before birth than die of various causes in the first year. Nature intended the womb to be a safe space. Today, doctors have made it the most unsafe space for the female child," he says. He believes that doctors must be held responsible "They have aggressively promoted the misuse of technology and legitimised

foeticide." Researchers and scholars use hard-hitting analogy to emphasise the extent of the problem. Dr. Satish Agnihotri, senior IAS officer and scholar who has done extensive research on the issue, calls the technology "a weapon of mass destruction". Dr. Bedi refers to it as genocide: "More than 6 million killed in 20 years. That's the number of Jews killed in the Holocaust."

Foeticide is also one of the most common causes of maternal mortality. The sex of the foetus can be determined only around 14-16 weeks. This means most sex selective abortions are late. Abortion after 20 weeks is illegal in India. Donna Fernandes, Vimochana, a Bangalore-based NGO, says foeticide is related to a host of other social problems as varied as privatisation of medical education and dowry. Karnataka has the highest number of private medical colleges. Healthcare turning commodity has led to terrifying consequences. Adds Fernandes, "Wherever green revolution has happened foeticide has increased. With more landholdings and wealth inheritance dowry has increased. Daughters are considered an economic liability. Today, people don't want their daughters to study higher a more well-educated groom will demand more dowry." Ironically, as income levels increase, sex determination and sex selection is increasing. The most influential pockets have the worst sex ratios. Take Punjab for instance 793 girls for every 1,000 boys against the national figure of 927. Or South Delhi one of the most affluent localities of the Capital 760. According to Satara-based advocate Varsha Deshpande, small families have come at the cost of the girl child. In patriarchal States like Rajasthan where infanticide has existed for centuries, this new technology has many takers. Meena Sharma, 27, television journalist from Rajasthan, who did a series of sting operations across four States last year, says, "Today, people want to pretend they are modern and that they do not discriminate between a girl and a boy. Yet, they will not hesitate to quietly go to the next village and get an ultrasound done." Sharma was determined to expose the widespread malpractice. She travelled with pregnant women as "decoys" across four States and more than 13,000 km to do a series of sting operations. She says more than 100 doctors of the 140 they met were ready to do a sex selective abortion, some as late as the seventh month. "We were shocked at the greed we saw doctors did not even ask why we wanted to abort, far from dissuading us from doing so," she says. What's the solution? Varsha Deshpande says the PCPNDT Act (Pre-Conception and Pre-Natal Diagnostic Techniques Regulation and Prevention of Misuse) is very well conceived

and easy to use. "We have done 17 sting operations across Maharashtra and got action taken against more than 25 doctors," says Varsha. She adds that other laws for violence against women such as dowry, domestic violence, rape, put the control in the hands of the police which is biased. Therefore, even though the law exists, offenders get away. This law preventing sex determination and sex selection is much easier to use, she says.

Akhila Sivadas, Centre for Advocacy and Research, Delhi, agrees that the law is very well conceived and the need of the hour is legal literacy to ensure the law is implemented. "The demand and supply debate has been going on for some time. Doctors say there is a social demand and they are only fulfilling it. They argue that social attitudes must change. However, in this case supply fuels demand. Technology will have to be regulated. Technology in the hands of greedy, vested interests, cannot be neutral. There is a law to prevent misuse and we must be able to use it," she says. CFAR is currently partnering with local NGOs in six districts of Rajasthan to help ensure implementation of the law. On the "demand" side, experts such as Dr. Agnihotri argue that women's participation in workforce, having disposable incomes and making a contribution to larger society will make a difference to how women are seen. Youth icons and role models such as Sania Mirza are making an impact, he says. Others feel there needs to be widespread visible contempt and anger in society against this "genocide" "the kind we saw against the Nithari killings," says Dr. Bedi. "Today nobody can say female foeticide is not their problem." Time we all did our bit to help save the girl child. Time's running out.

1. Which of the following will Dr. George agree to?

Option 1 : The girl child is as safe in the mother's womb as after birth.

Option 2 : The girl child is more safe in the mother's womb in comparison to after birth.

Option 3 : The girl child is more safe after birth as compared to the mother's womb.

Option 4 : None of these

2. What is the solution to the problem of female foeticide as envisioned by Dr. Bedi?

A. Effective use of law.

B. Mass public outrage.

A. Comparison with Nithari killing.

D. Contempt towards doctors.

3. What is the tone of the passage?

Option 1 : Factual

Option 2 : Biased

Option 3 : Aggressive

Option 4 : Sad

4. What is Akhila Sivadas's opinion on the PCPNDT act?

1 : The act is inconsistent.

2 : The act needs reform.

3 : The act encourages demand for foeticide.

4 The act is sound, but needs enforcement.

5. What does the word sanitised imply in the first paragraph of the passage?

Option 1 : Unforgivable Option 2 : Legitimate 3. Free from dirt 4 : None of these

6. What is the doctors' explanation for foeticide?

Option 1 : They think it is legitimate. Option 2 : They do it because people demand it.

Option 3 : The technology is available and there is no harm using it. Option 4 : None of these

7. Which of the two people mentioned in the passage suggest similar solution to the problem?

Option 1 : Dr. Agnihotri and Dr. George Option 2 : Dr. Bedi and Dr. Agnihotri

Option 3 : Dr. George and Dr. Bedi Option 4 : Dr. George and Miss Sivadas

8. Which "demand" does the author refer to, in paragraph 5?

Option 1 : Demand for principled doctors. 2 : Demand for high income jobs for women.

Option 3 : Demand for youth icons. Option 4 : Demand for sex determination and abortion.

PASSAGE

Along with the obscurantist language, bribe-taking culture around the world often involves the avoidance of physically handing the money from one person to another. One obvious reason is to avoid detection, which is why bribes are known as —envelopes in countries from China to Greece. But avoidance of a direct hand —over is common even where there is no chance of detection. There will always be some officials who will take money right from a bribe-player's hands, but most seem to prefer to find some way to hide the money from view. Rich Westerners may not think of their societies as plagued by corruption. But the definition of bribery clearly differs from person to person. A New Yorker might pity the third-world businessman who must pay bribes just to keep his shop open. But the same New Yorker would not think twice about slipping the \$50 to sneak into a nice restaurant without a reservation. Poor people the world over are most infuriated by the casual corruption of the elites rather than by the underpaid, —tip-seeking soldier or functionary. Thus there is no single cultural or social factor that inclines a society towards corruption, but economic factors play a big part. Most clearly, poverty and bribery go together. (For Complete Passage : <http://www.economist.com/node/8401139>.)

1. What is the author likely to agree to in the following?

Option 1 : Some cultures suffer corruptions while others do not.

Option 2 : Social factors incline a society towards corruption.

Option 3 : Bribery is not a cultural phenomena.

Option 4 : None of these

2. Which of the following the author does not identify as linguistic manifestation of corruption?

A. Asking for a favour.

B. Use of double meanings.

B. Option 3 : Use of quasi-official terminology.

D. Relate to food item.

3. What is bribe generally called in China?

Option 1 : Hand-over

Option 2 : Refresco

Option 3 : Envelopes

4 : Baksheesh

4. In summary what does the passage primarily suggest and provide evidence for?

Option 1 : Corruption is always concealed in some way, both linguistically and in the process.

Option 2 : Corruption exists only in developing economies.

Option 3 : Corruption is an unethical practice.

4 : Corruption slows down GDP growth.

5. What could be the meaning of the word dissimulation, as can be inferred from the context it is used in first line of the passage?

Option 1 : Hypocrisy
